

## Appendix 4. Placing of shipping labels

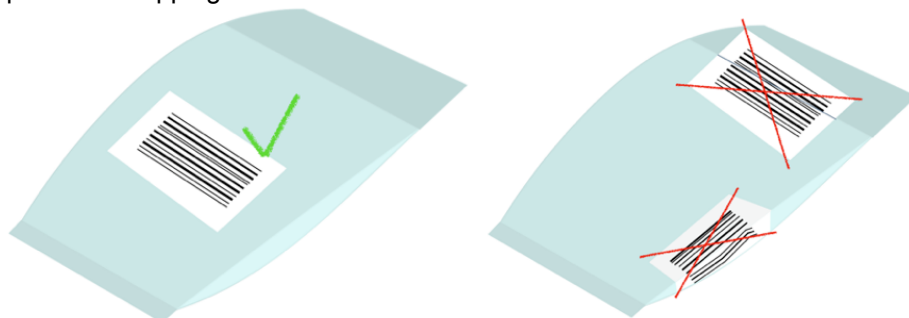

### Package

Always place the shipping label as close to the center as possible, always on the biggest side of the package. Never place the shipping label on an uneven surface or around a corner.

### Bags

Always place the shipping label on the largest side of the bag, always on a smooth surface. Never place the shipping label on an uneven surface or around a corner.

### Other

Pay attention to:

- That there are no white or black dots/areas on the barcode.
- Plastic or other label that covers the original shipping label.
- That the shipping label is not uneven or placed around a corner.
- That when sending cylinder packages always use a manchette approved by Budbee.
